Dear Hiring Manager:

As an experienced Enterprise Infrastructure focused Project and Program Manager I am interested in GitHub's current opening for Senior Technical Project Manager. I have outlined how some of my experience of more than 15 years as a Technical Project and Program Manager meets the qualifications GitHub has outlined as desirable on Github.com for your review. In addition to the submitted Resume, I have published a Repo on Github.com for review as well. Lastly some additional details regarding my experiences and skills can be found by reviewing my LinkedIn Profile.

Please review my Resume and associated materials provided as consideration for candidacy for the position. I look forward to any opportunity to discuss the position and how I feel I might make a positive impact for GitHub and its employees and customers should I be chosen for the role.

Thank you for your time and consideration.

Sincerely,

Andrew J Milewski III
